The smart junction box has internal lock and unlock relays that cannot be accessed. If cleaning connectors do not help replacement of the smart junction box will have to be performed. This SJB receives input from both the key fobs and unlock switches. The smart junction box is located near LF kick panel here is a diagram

### I have a 2004 Freestar. The passenger door locks are ...

I believe the smart junction box is actually to the left of the steering wheel by the brake pedal. That one will include the fuses that start with the 2, so fuse F2.3 is actually fuse number 3 for the front wiper. Number 7 for the rear wiper. In the bec, that is the power distribution box is located in the engine compartment.

DIY reset of Smart Junction Box? Post by jerak » Thu Mar 16, 2017 10:56 pm. I've got no backlighting on steering wheel buttons, shift lever indicator, headlight switch, or top row dash lights. These are all on the same circuit which is protected by fuse F10. That fuse was blown in my car. I replaced it, but still none of these lights work (and ...

### DIY reset of Smart Junction Box? - Ford Flex Forum

The items with the red dots control the fan speeds. If the main relay does not power on you get no fan control. The board pulls the relay coil to ground to turn it on. I would check to see if you have two power feeds at the relay. Then see if the ground activates when you turn on the A/C or heat. If not, the smart junction box has a fault.
