On the simplest of outboard engines these are easily replaceable, often installed inline between the fuel inlet and the carburetor. Some smaller or older outboards may not even have one. Newer, fuel-injected outboards can have as many as 12 of these filters—two or three primaries and one or more for each fuel injector.

The Yamaha outboard alarm system can fail just like any other system on your outboard. Troubleshooting the alarm system includes making sure the horn associated with the alarm works, making sure the warning light comes on and the horn sounds when the oil level drops below acceptable levels and ensuring the warning sounds if the engine overheats.
