Using the process of meiosis. D. Using the host cell's DNA to create new viruses. 2. A virus is unique in that it: A. Contains DNA. B. Contains RNA.

Intro to Viruses

Viruses are usually specific to the host. For example, the chickenpox virus infects humans, but does not infect dogs. Some viruses can jump species, like the swine flu which originated in pigs and then jumped to human hosts. Viruses make a person sick when they get into the cells and make more viruses, which kills the cells.
