A Brain for All Seasons: Human Evolution and Abrupt ...

William H. Calvin's marvelous A Brain for All Seasons argues that such cycles of cool, crash, and burn powered the pump for the enormous increase in brain size and complexity in human beings. Driven by the imperative to adapt within a generation to "whiplash" climate changes where only grass did well for a while, our ancestors learned to cooperate and innovate in hunting large grazing animals.

A Brain for All Seasons Summary - eNotes.com

One of the most shocking scientific realizations of all time has slowly been dawning on us: the earth's climate does great flip-flops every few thousand years, and with breathtaking speed. Many times in the lives of our ancestors, the climate abruptly cooled, just within several years. Worse was the accompanying drought and the forest fires, all around the world.

Science for kids | Body Parts - THE HUMAN BRAIN ...

William H. Calvin, on the faculty at the University of Washington's School of Medicine, offers in "A Brain for All Seasons" a modification of Darwin's theory that is both illuminating and reasoned. He argues that while Darwin thought in terms of eons of time and slow progression across thousands of generations, some evolutionary processes might be more immediate and striking.
