Technological forecasting. Technological Forecasting (TF) is concerned with the investigation of new trends, radically new technologies, and new forces which could arise from the interplay of factors such as new public concerns, national policies and scientific discoveries. Many of these forces are beyond the control, influence and knowledge of individual companies.

The year 1969 was prominent for mankind's landing on the moon, and the technological advances that allowed that momentous event to happen. These advances gave the impetus for the launching of the journal Technological Forecasting & Social Change.

Technological Forecasting and Social Change - Journal ...

Technology forecasting has existed in one form or another for more than a century, but it was not until after World War II (WWII) that it began to evolve as a structured discipline. The motivation for this evolution was the U.S. government's desire to identify technology areas that would have significant military importance.

2 Existing Technology Forecasting Methodologies ...

1458 M. Godet / Technological Forecasting & Social Change 77 (2010) 1457–1463. approach began to spread. It seems to me that the crushing defeat in Vietnam, despite operational research methods and systems analysis may continue to have an impact on rational approaches given that Russia (past), the West (now) may well be powerful

Technological Forecasting & Social Change

Technology forecasting attempts to predict the future characteristics of useful technological machines, procedures or techniques. Researchers create technology forecasts based on past experience and current technological developments. Like other forecasts, technology forecasting can be helpful for both public and private organizations to make smart decisions.

Model-based forecasting is the strongest choice when the underlying mechanism, or physics, of the problem is known, and as such it is the right choice in many scientific and engineering situations at Uber. It is also the usual approach in econometrics, with a broad range of models following different theories.
