AP Biology Reading Guide Julia Keller
12d Fred and Theresa Holtzclaw Chapter
17: From Gene to Protein 1. What is
gene expression? Gene expression is the
process by which DNA directs the
synthesis of proteins (or, in some cases,
just RNAs). The expression of genes that
code for proteins includes two stages:
transcription and translation. ...

Chapter 17. From Gene to Protein. Lecture Outline. Overview: The Flow of Genetic Information. The information content of genes is in the form of specific sequences of nucleotides along the DNA strands. The DNA inherited by an organism leads to specific traits by dictating the synthesis of proteins and of RNA molecules involved in protein synthesis. Gene expression, the process by which DNA directs protein synthesis, includes two stages called transcription
