What Is Archaeology? - Definition, History & Topics ...

Archaeology is the study of human activity in the past, primarily through the recovery and analysis of the material culture and environmental data that they have left behind, which includes artifacts, architecture, biofacts and cultural landscapes. The development of the field of archaeology has its roots with history and with those who were interested in the past, such as kings and queens who wanted to show past glories of their respective nations. The 5th-century-BCE Greek historian Herodotus w

History of archaeology - Wikipedia

Archaeology, sometimes spelled archeology, is the study of human activity through the recovery and analysis of material culture. Archaeology is often considered a branch of socio-cultural anthropology, but archaeologists also draw from biological, geological, and environmental systems through their study of the past.

Archaeology - Wikipedia

Archaeology is an ever-developing discipline, providing new insight into the past with every new discovery. Many of these findings are featured at the Biblical Archaeology Society and at other similar sources. The claims of Judaism and Christianity are more than proverbial insights; they are claims about the historic past.
