Neil Ashcroft - Wikipedia

There is yet to be a text for an undergraduate course that matches the role Ashcroft and Mermin played for a graduate solid state course -- coherent, intuitive, and mathematically rigorous. While I can envision a better text, I have yet to find it. I would be likely to use this text again based on what I've seen that's available.

(a) In two dimensional system the number of allowed values of space inside a volume is .The volume in space is the area of circle with radius , therefore the number of allowed values of within the area of circle is .. It is important to note that each allowed -value leads to two one-electron levels, one for each spin value. Therefore in order to accommodate electrons, one must have
