Critical Appraisal Template

Methodological assessment of studies selected as potential sources of evidence is based on a number of criteria that focus on those aspects of the study design that research has shown to have a significant effect on the risk of bias in the results reported and conclusions drawn.

Checklists

Appraisal tool for Cross-Sectional Studies (AXIS) Critical appraisal (CA) is used to systematically assess research papers and to judge the reliability of the study being presented in the paper. CA also helps in assessing the worth and relevance of the study [1]. There are many key areas to CA including

Appraisal tool for Cross-Sectional Studies

Critical appraisal checklists. Our checklists are critical appraisal tools to help identify the many ways that error and bias can distort research results. We have used our own experience and research to develop a collection of checklists, designed to support the critical reading of a research study. The checklists can help assess any potential sources of bias in the research study that can be recorded in a narrative summary.
