Also highly accessible are other references to the liar's eyes, the belief that deception can be detected from the liar's facial expressions, and the belief that one needs to know a person to detect that person's lies. These three beliefs are mentioned first by 43.06%, 38.30%, and 35.49% (respectively) of the participants who mentioned them.

A WORLD OF LIES

Verbal lie detection. DePaulo et al.'s comprehensive meta-analysis of nonverbal and verbal cues to deception showed that such cues are generally weak and unreliable (). Research has also suggested that this applies more to nonverbal cues than to verbal cues to deception: A meta-analysis about observers' ability to detect deceit when observing nonverbal and verbal cues to deception showed that ...
