A structural family therapy term for accepting and accommodating to families to win their confidence and circumvent resistance Linear causality The idea that one event is the cause and another is the effect; in behavior, the idea that one behavior is a stimulus, the other a response

Family Therapy: Concepts and Methods Flashcards | Quizlet

The way the family operates influences how the client's problems formed and how they are encouraged or enabled by other members of their family. Family therapy can employ techniques and exercises from cognitive therapy, behavior therapy, interpersonal therapy, or other types of individual therapy. Like with other types of treatment, the techniques employed will depend on the specific problems the client or clients present with.
