The solutions have been largely prepared by P.-G. Lee, A. Tosilevich, D. Pantuso, X. Wang, K. T. Kim and L. Zhang in my finite element research group at M.I.T. I helped in giving guidance. We give solutions to the exercises that do not require the use of a computer program.

that in the solution of a well-posed mathematical model, the procedure will always, for a reasonable finite element mesh, give a reasonable solution \check{S} and if the mesh is reasonably fine, an accurate solution of the chosen mathematical model is obtained [3]. By reliability of a finite element procedure we also mean that if some analysis

However, the ease of use of finite element procedures should be much increased and more effective finite element procedures are greatly needed.
