Fishes: An Introduction to Ichthyology- International ...

Fish. FISH. Fish are a group of aquatic animals with skulls, gills and digitless limbs. They are separated into four groups: cartilaginous fish (such as sharks and rays), bony fish, jawless fish, and hagfish. Living in water presents a number of problems such as maintaining salt concentrations and neutral buoyancy and this group of animals has evolved a number of ways to deal with these issues.

Fish | Basic Biology

CHAPTER 1 - INTRODUCTION 1.1 THE IMPORTANCE OF FISHERIES. The importance of fisheries in a country cannot only be measured by the contribution to the GDP, but one must also take into consideration that fisheries resources and products are fundamental components of human feeding and employment.
