Health Information Technology Evaluation Handbook : From ...

HIT evaluation is defined as "the act of measuring or assessing the properties of a health information system (in terms of planning, development, implementation, or operation), the result of which informs a decision to be made concerning that system in a specific context" . As the title, Handbook of Evaluation Methods for Health Informatics, suggests, this is not a textbook but a reference book .

Handbook of Evaluation Methods for Health Informatics

Health technology assessment (HTA) refers to the the systematic evaluation of properties, effects, and/or impacts of health technology. It is a multidisciplinary process to evaluate the social, economic, organizational and ethical issues of a health intervention or health technology.
