Most people look at the extension of a file and then guess the type of file from that extension. For example, when you see a file with an extension of gif, jpg, bmp, or png you think of an image file, and when you see a file with an extension of zip, you assume the file has been compressed using a zip compression utility.

### Determine a File Type Using the 'file' Linux Command

Now change the file's extension to the extension of the type which you want to change into. In this example, we change a 'text' file to a 'python' file. The extensions for a text file are 'txt' and for python 'py'. Process of changing a file type. Here is a list of common file extensions used in the world of computing. We have ...
