Jargon Code. Probably the most obvious form of linguistic steganography, jargon code creates a verbal or written message as the cover for the secret information. A jargon-coded message is a lot like a substitution cipher in many respects, but instead of replacing individual letters, the words themselves are changed.

Types of Steganography | Investigators Guide to Steganography

The Six Categories of Steganography In all methods of steganography, something is done to conceal a message; naturally, these actions or techniques can be separated and analyzed to learn what is happening during the whole process. The six categories of steganography are:
