Journal of Cancer Survivorship | Volume 14, Issue 5

Breast cancer is the most common malignancy in women in the UK, with an average lifetime risk of 1 in 8. Although the incidence of the disease has risen by 6% over the last 10 years, mortality rates have steadily fallen, and currently 80% of patients with early breast cancer have a projected survival of >10 years.1 As a result, the number of patients living beyond a breast cancer diagnosis has ...
