King Air C90A

For the standard C90, the C90A flight manual performance data was used. Up to about 14,000 feet at ISA, the PT6A-21 delivers its full take-off torque. At recommended cruise this is 1,315 ft/lbs per engine. Above this altitude, the engine loses torque and at 26,000 feet produces only 862 ft/lbs torque.

Systems King Air C90 Flight Manual - SmartCockpit

The first Model 90 King Air was introduced in 1964; it was basically a Queen Air with turboprops. After its introduction, the 90 series went through a number of airframe and powerplant modifications. The King Air competes with other turboprops such as the MU-2, Conquest, and Cheyenne 400 LS.

Beechcraft King Air 90 - AOPA

About the King Air 90. The Model 90 King Air began its life as the Model 120 in 1961. In May 1963, Beechcraft began test flights of the proof-of concept Model 87, a modified Queen Air with Pratt & Whitney Canada PT6A-6 engines. Two months later Beech publically announced the Model 87 with orders began being accepted for the "King Air" a ...

The Beechcraft King Air family is part of a line of American utility aircraft produced by Beechcraft. The King Air line comprises a number of twin-turboprop models that have been divided into two families. The Model 90 and 100 series developed in the 1960s are known as King Airs, while the later T-tail Model 200 and 300 series were originally marketed as Super King Airs, with the name "Super ...
