Networking Essentials Final Exam Answers - ICT Community

LAN switching is a form of packet switching in which the data packets are transferred from one computer to another over the LAN network. LAN switching technology is a vital part of the network design which helps to improve the overall efficiency of LAN and address the existing bandwidth issues.

LAN Switch vs SAN Switch: What Is the Difference[] | FS ...

Something to know about wan/lan switching: it only works if the NIC is on the motherboard (i.e. Under control of the BIOS. So, USB ports extenders won't work. (HP) Docking stations should since they just extend the ethernet output from the MB. The little adapter of the 1040G2 just contains a digital video to VGA chip.

LAN/WLAN-switching

LAN switching is a form of packet switching in which the data packets are transferred from one computer to another over a network. Switching technologies are vital to network design, as these technologies permit the traffic to be sent only where it is required; in most of the cases, making use of fast, hardware-based methods. LAN switching ...
