### **Pulsation (Acoustic) Analysis : EDI**

The API 618 covers the minimum requirements for reciprocating compressors for use in oil, chemical, and gas industry services and for process gas at any pressure, or for air with gauge pressure more than 9 bar. The compressors covered by the API 618 are low to moderate speeds (typically between 300 and 750 rpm).

### **API 618 - Sim Engineering**

API has established standard guidelines for reciprocating compressors in API Standard 618. The previous version of the standard is the Fourth Edition, adopted in June 1995. The Fifth Edition was issued in 2007, however the Fourth Edition is still often used as a basis for many studies.
