No tweaking to get the effect sound from the last gig. You also get that lexicon pro effect sound and quality. Good stuff!! I bought this model over the mx200 because this model has a heavy duty plug that can take moving abuse from gig to gig, unlike the mx200 which has a jack plug. I move a lot and I needed something that can take abuse.

Lexicon's excellent signal-processing units range far and wide in high-end studios and sound-support systems. Of late, the company has been addressing the needs of project-studio developers with the MX200 and MX400 effectors, offering classic reverb sounds (plus other treatments), in a box that can be controlled from a DAW.

Lexicon MX300 review | MusicRadar

The Lexicon Mx300 has 16 different reverbs and a few different delays and modulation type effects. I have used the Lexicon MX300 on a few different occasions, it is a very easy to use and understand piece of gear. It will last you a long time if you take care of it or rack it and keep it out of the way of the rest of your gear.

User reviews: Lexicon MX300 - Audiofanzine

Completely different processors. The MX200 is all new with new more powerful chip. You're complaining about the MPX200, the last unit made by Lexicon in Bedford, Mass. yet your thread title reads "do not buy the MX200"... Please either fix the thread title or say it right. If you don't like the MPX200, cool but the MX200 is a whole nother animal.

The 250GB Crucial MX200 is successor to the hugely successful MX100. Both drives use the same NAND and controller but the new MX200 features Dynamic Write Acceleration (DWA) which is a new dynamically sized SLC cache. Samsung were the first to introduce SLC caching on the 840 Evo nearly two years ago so Crucial are somewhat late to the party.
