## **Timeline of the evolutionary history of life - Wikipedia**

Life history theory is an analytical framework designed to study the diversity of life history strategies used by different organisms throughout the world, as well as the causes and results of the variation in their life cycles. It is a theory of biological evolution that seeks to explain aspects of organisms' anatomy and behavior by reference to the way that their life histories—including ...

1. Introduction. In evolutionary biology,  
'life history' refers to the developmental  
programme of an organism, including its  
period of immaturity, reproductive rate  
and timing, caregiving investment and  
longevity [1,2]. Life history has played an  
important role in evolutionary theory  
going back at least to Macarthur and  
Wilson's distinction between 'r' and 'k'
