have to remember that when boring out jaws. Edit, literally the only dimension I care about on the jaws is a, the rest don't really matter unless you don't have the time to check the tool clearances yourself.

Mazatrol T32-2 Quick Turn 15N - Practical Machinist

We bought this machine new and it's still in great shape. A rear bearing dried out and started to grumble. Had an ex-Mazak repair guy pull the spindle assembly and repair. Got new bearings from Japan, same part number etc as was in there originally. Assembly went together and was put in and ran fine. Then we realized it had .008 in and out float.

I have problem with my Mazak QuickTurn 15N (1990y T32-2) I had a problem with the main power supply in the building (blown fuses during machine start). After this time, errors began to appear sporadically. I thought it was the fault of the spindle controller (Mitsubishi Freqrol FR-SE) but it was in repair and proved to be good .
