The Medical Devices Regulations stem from the 1992 report of the Medical Devices Review (Hearn) Committee. The report advocated two principles: (1) the level of scrutiny afforded a device should be dependent upon the hazard that the device presents; and (2) the safety and effectiveness of the device can best be assured through a balance of quality systems requirements, premarket scrutiny and postmarket surveillance.

### Guidance Document: Guidance on supporting evidence to be ...

Essential principles of safety and performance provide broad, high-level criteria for the life-cycle of medical devices. Annex A of the guidance addresses the use of standards in meeting the essential principles. This annex indicates that consensus standards can provide a greater level of detail and specificity than the essential principles.
