Human Nature and Human Diversity

The nature versus nurture debate is one of the oldest issues in psychology. The debate centers on the relative contributions of genetic inheritance and environmental factors to human development. Some philosophers such as Plato and Descartes suggested that certain things are inborn, or that they occur naturally regardless of environmental influences.

Nature vs. Nurture: Genes or Environment?

They discovered based on the mapping of the human genome that every human on earth is 99.99% genetically similar to every other human being on earth Repartition of the 0.01% difference: 5% difference among races, 95% differences within a race Nature genetics, 2004: race does NOT exist biologically; there is no white, black, Arab, Asian race, and it is just a social concept We share: 95-98% of our DNA with chimps, 90% of our DNA with mice, 50% of our DNA with bananas, 44% of our DNA with fruit ...
