companies in Canada, We offer a fast, flexible and effective book distribution service stretching across the USA & Continental Europe to Scandinavia, the Baltics and Eastern Europe. Our services also extend to South Africa, the Middle East, India and S. E. Asia

## **Surface Area And Volume Multiple**

## Access Free Surface Area And Volume Multiple Choice Questions

Hint: Surface area of the metal sheet =  $2 [27 \times 8 + 8 \times 1 + 27 \times 1] = 2[216 + 35] = 502 \text{ cm}^2$  Since this sheet is melted to form a cube, therefore, Volume of cube = Volume of cuboid metal sheet  $\Rightarrow$  side  $^3 = 27 \times 8 \times 1 \text{ cm}^3 \therefore$  side =  $\sqrt[3]{27 \times 8 \times 1} = 6 \text{ cm}$   
 $\therefore$  Surface area =  $6 \times 6^2 = 216 \text{ cm}^2$   
Difference =  $502 - 216 = 286 \text{ cm}^2$ .
