emphasizes integrating
electromagnetic theory
with physical optics.

The survey follows the
historical development
of physics, culminating
in the use of four-
vector relativity to fully
integrate electricity
with magnetism.

a force upon itself. If we model the particle as a spherical shell of radius R , and calculate the force of one piece of this shell on another and eventually integrate over the whole particle, there will be a net force on the particle due to the breakdown of Newton's third law. This symmetry breaking mechanism relies on the finite size of the particle ...
