The Inequalities of Globalization

Globalization and Inequality This lecture will examine the process of globalisation and, in particular, the implications for inequality. The perceived increase in inequality is leading to new left-leaning and populist movements developing across the developed world, including in the US.

Globalization and Inequality

Globalization and Inequality A fundamental challenge posed by the increasing reach of global markets (à€globalization') is that global markets are inherently dis-equalizing, making rising inequality in developing countries more rather than less likely. There are at least three reasons.

Globalization Will Increase Inequality

Global inequality (the relative inequality of incomes among all peoples in the world) raised from 1820 to about 1990. This increase was driven by different growth processes among countries. Inequality within countries was stagnant or falling over much of this period, most notably over the middle half of the twentieth century.
