## **The Social Construction Of Dementia**

In this study the social construction of dementia is examined closely for the first time. Nancy Harding and Colin Palfrey show how Western society sees dementia as a disease, rather than a natural part of the ageing process. They take issue with the constructed view of the body as a machine, whose parts

Seven themes emerged from the  
analysis: a problem of aging; use it or  
lose it; divine punishment; loss of  
agency; psychosis and insanity; brain  
degeneration and objectification; and  
dementia as a social condition. Each  
theme corresponds to a particular way  
of conceptualising dementia and has  
influenced modern representations of  
the condition.
