B737 Engine Start Switches
Critical toggle switches also have a pull to move lock. This safety feature stops certain toggles from being moved accidentally, like the fuel pumps for example. The first step was to assemble the many, many LED's. Everyone of them had to be soldered and assembled. There are several different colors also, amber, green and blue.

Overhead - 737NG-Sim
I was hoping that a fellow avsim member could clarify these 2 questions for me. Oh I am building a Overhead for 737NG I have several 737-800 Overhead panel diagrams and the toggle switch types are not the same so I am a little confused. Which overhead switches on the overhead of a 737NG are MON-O...

737 Overhead Toggle Switch Types? - Hardware Controllers ...
Toggle switches are either lever-type or rocker-type electrical switches with two or three switch positions. A 2 way switch has on-off positions and a 3 way switch has on-off-on positions. A toggle switch is typically a low-voltage device, such as 12V. A rocker switch has a rocker mechanism for actuation.

Question about the 737NG Engine start switch. There is a question comes up in mind during a flight, if I select the engine start switch as Ground instead of Continue, what will happen? will it broken the start motor or sth else? And if we need to us e anti ice, is it ok use the FLT instead of the continue position? Reply. 16th Oct 2012, 09:01 ...

Question about the 737NG Engine start switch - PPRuNe Forums
Locking Toggle Switch Caps. The next project I decided to tackle was replacing the silver locking toggle switch caps on my overhead with white caps like the real aircraft. I purchased real Honeywell locking toggle switches for my overhead but they only come with silver caps, not the white ones that you see in a typical 737NG overhead.
