Intersections are pivotal conflict points for both safety and operations. Great streets are optimized for multiple modes and balance the converging demands of all users. Effective intersection design convenes elements of the street design toolbox including lane configuration, stop or signal control, transit stop location, pedestrian safety and access, management of turning movements, and bikeway location and design.

Intersections | National Association of City ...

Complete Streets Active Transportation. Active transportation refers to modes of travel that do not involve motorized vehicles; the most prominent examples include biking and walking, although sometimes active transportation can be supplemented by motorized vehicles (e.g., walking to a transit stop, using manual pedal power on an electric-assisted bicycle).

Complete Streets - Institute of Transportation Engineers

The Guide builds on NACTO's successful Urban Street Design Guide, Urban Bikeway Design Guide, and Transit Street Design Guide, expanding from a North American context to address a variety of street typologies and design elements found around the world.

Transit Street Design Guide: National Association of City ...

Transit Street Design Guide National Association of City Transportation Officials (NACTO) This very comprehensive design guide focuses entirely on streets used by public transport, and is a fine compendium of solutions and rationales. It is one of a suite of four street design guides produced by NACTO.

Transit Street Design Guide | Book Review | Urban Design Group

The Transit Street Design Guide goes into greater detail on these questions than NACTO's Urban Street Design Guide, released in 2013. Before the publication of this guide, city transportation officials looking to make streets work better for transit still had to hunt through a few different manuals, said NACTO's Matthew Roe.

New guide shows how streets can be designed with transit ...

Transit Street Design Guide Product Code/ISBN: 9781610917476 \$58.95 As the world gets bigger and cities fill up with more companies and businesses the streets that we once designed for private transportation are now being used for transit.
